SUMMARY

As a recent graduate in web development, I have a strong foundation in HTML, CSS, and TypeScript and also have experience with frameworks like Next.js and Express.js. I am eager to expand my experience and learn from practical experiences in the field. I am ready to adapt quickly and tackle challenges with creativity. I have a keen interest in staying updated with the latest trends in web design and technology.

WORK EXPERIENCE

Front-End Developer Intern | Advomed | Remote | Dec 2024 – Feb 2025

- Contributed to the front-end upgrade of a medical clinic management system, developing features for several key application routes based on new V2 Figma designs during a ~2.5-month internship.
- Implemented complex interactive UI components based on Figma designs, such as a dynamic schedule table and a custom dual list box for selecting categorized medical tests (featuring search/filter and transfer logic), using Next.js, TypeScript, and Chakra UI v3.
- Translated static UI/UX designs into functional, responsive web elements, utilizing libraries like TanStack Table and adapting components to meet precise specifications without reference to the previous application version.
- Integrated client-side functionality using Zod for validation and React Hook Form, employing React Context API and Zustand extensively for efficient state management (e.g., managing shared tab state) and data sharing across components.

PROJECT EXPERIENCE

- **FindTix**
  Developed key features for FindTix, an event ticketing website, including user management functionalities such as registration, login authentication, and profile editing. Created a ticket purchase system with shopping cart and Midtrans payment gateway integration.
  Link: FindTix
- **Weather Report**
  Developed Weather Report, a forecast website using Next.js and TypeScript. Implemented features for viewing weather in current and searched locations, integrating data from OpenWeatherMap API. Created a responsive, user-friendly web app with real-time data, demonstrating proficiency in modern web development technologies.

EDUCATION

- **Purwadhika Digital Technology School (2023-2024)**
  Fullstack Web Development
- **Universitas Islam Al-azhar Mataram (2013 - 2020)**
  Pendidikan Kedokteran

LICENSES & CERTIFICATION

- **Purwadhika Digital Technology School (Nov 2023)**
  Fullstack Web Development

SKILLS

• TypeScript	• Golang	• mySQL Database & Query	• React
• Next.js	• Express.js	• Git & Github
